

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY
INDEX, VOLUMES 91-100

1959-1961

	VOL.	PAGES
ACCOLA, R. D. M. The bilinear relation on open Riemann surfaces.....	96 ₁	143-161
ALBERT, A. A. and PAIGE, L. J. On a homomorphism property of certain Jordan algebras.....	93 ₁	20- 29
ALLING, N. L. On ordered divisible groups.....	94 ₂	498-514
ANDERSON, L. W. On the distributivity and simple connectivity of plane topological lattices.....	91 ₁	102-112
ANDREWS, G. E. An asymptotic expression for the number of solutions of a general class of Diophantine equations...	99 ₂	272-277
ARMENTROUT, S. Separation theorems for some plane-like spaces.....	97 ₁	120-130
ARTZY, R. Crossed-inverse and related loops.....	91 ₃	480-492
ASKEY, RICHARD and HIRSCHMAN, ISIDORE, JR. Weighted quadratic norms and ultraspherical polynomials. I....	91 ₂	294-313
AUMANN, R. J. The core of a cooperative game without side payments.....	98 ₃	539-552
AUSLANDER, LOUIS. Discrete uniform subgroups of solvable Lie groups.....	99 ₁	398-402
AUSLANDER, LOUIS and MARKUS, L. Classical differential equations on manifolds.....	91 ₁	113-128
AUSLANDER, MAURICE and GOLDMAN, OSCAR. Maximal orders.....	97 ₁	1- 24
— The Brauer group of a commutative ring.....	97 ₃	367-409
AXT, PAUL. On a subrecursive hierarchy and primitive recursive degrees.....	92 ₁	85-105
BADE, W. G. A multiplicity theory for Boolean algebras of projections in Banach spaces.....	92 ₃	508-530
BALAKRISHNAN, A. V. An operational calculus for infinitesimal generators of semigroups.....	91 ₂	330-353
BARCUS, W. D. The stable suspension of an Eilenberg-MacLane space.....	96 ₁	101-114
BARROS NETO, J. Analytic distribution kernels.....	100 ₃	425-438
BASS, HYMAN. Finitistic dimension and a homological generalization of semi-primary rings.....	95 ₃	466-488
BAXTER, GLEN. A two-dimensional operator identity with application to the change of sign in sums of random variables.....	96 ₂	210-221

	VOL.	PAGES
— A convergence equivalence related to polynomials orthogonal on the unit circle.....	99 ₂	471-487
BEAR, H. S. A strong maximum modulus theorem for maximal function algebras.....	92 ₃	465-469
BEAUMONT, R. A. and PIERCE, R. S. Partly transitive modules and modules with proper isomorphic submodules... ..	91 ₂	209-219
— Partly invariant submodules of a torsion module.....	91 ₂	220-230
BECK, ANATOLE. Eigen operators of ergodic transformations	94 ₁	118-129
BELLMAN, RICHARD and COOKE, K. L. Stability theory and adjoint operators for linear differential-difference equations.....	92 ₃	470-500
BENEŠ, V. E. Combinatory methods and stochastic Kolmogorov equations in the theory of queues with one server	94 ₃	282-294
BIALYNICKI-BIRULA, ANDRZEJ. On automorphisms and derivations of simple rings with minimum condition.....	98 ₃	468-484
BIRKHOFF, GARRETT and VARGA, R. S. Implicit alternating direction methods.....	92 ₁	13- 24
BLACKMAN, JEROME and POLLARD, HARRY. The finite convolution transform.....	91 ₃	399-409
BLANCH, GERTRUDE. The asymptotic expansions for the odd periodic Mathieu function.....	97 ₂	357-366
BLUMENTHAL, R. M. and GETOOR, R. K. Some theorems on stable processes.....	95 ₂	263-273
BLUMENTHAL, R. M., GETOOR, R. K. and RAY, D. B. On the distribution of first hits for the symmetric stable processes.....	99 ₃	540-554
BOSE, R. C. and SHRIKHANDE, S. S. On the construction of sets of mutually orthogonal latin squares and the falsity of a conjecture of Euler.....	95 ₂	191-209
BRAINERD, BARRON. On the embedding of vector lattices in F -rings.....	93 ₁	132-144
— A construction for the normalizer of a ring with local unit with applications to the theory of L -algebras.....	97 ₂	237-253
DE BRANGES, LOUIS. Some Hilbert spaces of entire functions	96 ₂	259-295
— Some Hilbert spaces of entire functions. II.....	99 ₁	118-152
— Some Hilbert spaces of entire functions. III.....	100 ₁	73-115
BREDON, G. E. On the structure of orbit spaces of generalized manifolds.....	100 ₁	162-196
BREDON, G. E., RAYMOND, FRANK and WILLIAMS, R. F. p -adic groups of transformations.....	99 ₃	488-498
BREMERMAN, H. J. On a generalized Dirichlet problem for plurisubharmonic functions and pseudo-convex domains. Characterization of Šilov boundaries.....	91 ₃	246-276

	VOL.	PAGES
BREWER, B. W. On certain character sums.....	99 ₂	241-245
BROWN, C. C. On the passage to equilibrium of Gibbsian ensembles.....	97 ₃	509-522
BROWN, LEON, SHIELDS, ALLEN and ZELLER, KARL. On absolutely convergent exponential sums.....	96 ₁	162-183
BROWN, MORTON. On the inverse limit of Euclidean N -spheres.....	96 ₁	129-134
CARLITZ, LEONARD and LEVINE, JACK. Some problems concerning Kummer's congruences for the Euler numbers and polynomials.....	96 ₁	23- 37
CARROLL, F. W. On some classes of noncontinuable analytic functions.....	94 ₁	74- 85
CHANG, C. C. A new proof of the completeness of the Łukasiewicz axioms.....	93 ₁	74- 80
CHASE, S. U. Direct products of modules.....	97 ₃	457-473
CHOW, Y. S. Martingales in a σ -finite measure space indexed by directed sets.....	97 ₂	254-285
CIESIELSKY, Z. Hölder conditions for realizations of Gaussian processes.....	99 ₃	403-413
CIMA, J. A. Note on a theorem of Grosswald.....	99 ₁	60- 61
CLARKE, A. B. On the representation of cardinal algebras by directed sums.....	91 ₁	161-192
CLIFFORD, A. H. Connected ordered topological semigroups with idempotent endpoints. II.....	91 ₂	193-208
COCKCROFT, W. H. The cohomology groups of a fibre space with fibre a space of type $\mathcal{K}(\pi, n)$. II.....	91 ₃	505-524
— On a theorem of A. Borel.....	98 ₂	255-262
CODDINGTON, E. A. and GILBERT, R. C. Generalized resolvents of ordinary differential operators.....	93 ₂	216-241
COGBURN, ROBERT and TUCKER, H. G. A limit theorem for a function of the increments of a decomposable process...	99 ₂	278-284
COHEN, ECKFORD. A class of arithmetical functions in several variables with applications to congruences.....	96 ₃	355-381
COHEN, HASKELL and COLLINS, H. S. Affine semigroups...	93 ₁	97-113
COHEN, H. J., SUPNICK, FRED and KESTON, J. F. On the powers of a real number reduced modulo one.....	94 ₂	244-257
COLLINS, H. S. and COHEN, HASKELL. Affine semigroups...	93 ₁	97-113
COMFORT, W. W. The Šilov boundary induced by a certain Banach algebra.....	98 ₃	501-517
COMFORT, W. W. and GORDON, HUGH. Vitali's theorem for invariant measures.....	99 ₁	83- 90
CONRAD, PAUL. Some structure theorems for lattice-ordered groups.....	99 ₂	212-240

	VOL.	PAGES
COOKE, K. L. The rate of increase of real continuous solutions of certain algebraic functional equations.....	92 ₁	106-124
COOKE, K. L. and BELLMAN, RICHARD. Stability theory and adjoint operators for linear differential-difference equations.....	92 ₃	470-500
CORSON, H. H. Examples relating to normality in topological spaces.....	99 ₂	205-211
CRAWLEY, PETER. Decomposition theory for nonsemimodular lattices.....	99 ₂	246-254
CRAWLEY, PETER and DEAN, R. A. Free lattices with infinite operations.....	92 ₁	35- 47
CRAWLEY, PETER and DILWORTH, R. P. Decomposition theory for lattices without chain conditions.....	96 ₁	1- 22
CUNNINGHAM, F., JR. <i>L</i> -structure in <i>L</i> -spaces.....	95 ₂	274-299
CURTIS, C. W. On the dimensions of the irreducible modules of Lie algebras of classical type.....	96 ₁	135-142
CURTIS, M. L. and WILDER, R. L. The existence of certain types of manifolds.....	91 ₁	152-160
DARST, R. B. A note on abstract integration.....	99 ₂	292-297
DAVISON, W. F. Mosaics of compact metric spaces.....	91 ₃	525-546
DEAN, R. A. and CRAWLEY, PETER. Free lattices with infinite operations.....	92 ₁	35- 47
DIAZ, J. B. and WALTER, W. L. On uniqueness theorems for ordinary differential equations and for partial differential equations of hyperbolic type.....	96 ₁	90-100
DILWORTH, R. P. and CRAWLEY, PETER. Decomposition theory for lattices without chain conditions.....	96 ₁	1- 22
DOLBEAULT, PIERRE. Formes différentielles méromorphes localement exactes. Compléments.....	91 ₃	390-398
DUFFIN, R. J. An analysis of the Wang algebra of networks	93 ₁	114-131
DUREN, P. L. Extension of a result of Beurling on invariant subspaces.....	99 ₂	320-324
EDREI, ALBERT and FUCHS, W. H. J. On the growth of meromorphic functions with several deficient values.....	93 ₂	292-328
EDWARDS, D. A. and IONESCU TULCEA, C. T. Some remarks on commutative algebras of operators on Banach spaces	93 ₃	541-551
EDWARDS, R. E. The stability of weighted Lebesgue spaces	93 ₃	369-394
EELLS, JAMES, JR. A generalization of the Gauss-Bonnet theorem.....	92 ₁	142-153
EGGAN, L. C. On Diophantine approximations.....	99 ₁	102-117
ELGOT, C. C. Decision problems of finite automata design and related arithmetics.....	98 ₁	21- 51

	VOL.	PAGES
ELLIS, ROBERT. A semigroup associated with a transformation group.....	94 ₂	272-281
ELLIS, ROBERT and GOTTSCHALK, W. H. Homomorphisms of transformation groups.....	94 ₁	258-271
EPSTEIN, GEORGE. The lattice theory of Post algebras.....	95 ₂	300-317
ERNEST, J. A. Central intertwining numbers for representations of finite groups.....	99 ₃	499-508
FEDERER, HERBERT. Curvature measures.....	93 ₃	418-491
— Currents and area.....	98 ₂	204-233
FELDMAN, JACOB. Examples of non-Gaussian quasi-invariant distributions in Hilbert space.....	99 ₂	342-349
FELDZAMEN, A. N. Semi-similarity invariants for spectral operators on Hilbert space.....	100 ₂	277-324
FELL, J. M. G. The dual spaces of C^* -algebras.....	94 ₃	365-403
FELLER, E. H. and SWOKOWSKI, E. W. Reflective N -prime rings with the ascending chain condition.....	99 ₂	264-271
FISHER, G. M. On the group of all homeomorphisms of a manifold.....	97 ₂	193-212
FLANDERS, HARLEY. The meaning of the form calculus in classical ideal theory.....	95 ₁	92-100
FONG, P. On the characters of p -solvable groups.....	98 ₂	263-284
FORSYTHE, G. E. and HENRICI, P. The cyclic Jacobi method for computing the principal values of a complex matrix.....	94 ₁	1- 23
FOX, CHARLES. The G and H functions as symmetrical Fourier kernels.....	98 ₃	395-429
— A solution of Chandrasekhar's integral equation.....	99 ₂	285-291
FRANK, EVELYN. A new class of continued fraction expansions for the ratios of Heine functions. II.....	95 ₁	17- 26
— A new class of continued fraction expansions for the ratios of Heine functions. III.....	96 ₂	312-321
FRIEDMAN, AVNER. Parabolic equations of the second order — A new proof and generalizations of the Cauchy-Kowalewski theorem.....	93 ₃	509-530
— Simplifying the structure of second order partial differential equations.....	98 ₁	1- 20
FRIEDMAN, BERNARD and NIVEN, IVAN. The average first recurrence time.....	99 ₂	303-307
FRIEDMAN, BERNARD and NIVEN, IVAN. The average first recurrence time.....	92 ₁	25- 34
FUCHS, W. H. J. and EDREI, ALBERT. On the growth of meromorphic functions with several deficient values....	93 ₂	292-328
GEHRING, F. W. The boundary behavior and uniqueness of solutions of the heat equation.....	94 ₃	337-364

	VOL.	PAGES
GETOOR, R. K. and BLUMENTHAL, R. M. Some theorems on stable processes.....	95 ₂	263-273
GETOOR, R. K., BLUMENTHAL, R. M. and RAY, D. B. On the distribution of first hits for the symmetric stable processes	99 ₂	540-554
GILBERT, R. C. and CODDINGTON, E. A. Generalized resolvents of ordinary differential operators.....	93 ₂	216-241
GINSBURG, SEYMOUR. Some remarks on abstract machines..	93 ₃	400-444
GINSBURG, SEYMOUR and ISBELL, J. R. Some operators on uniform spaces.....	93 ₁	145-168
GLAESER, GEORGES. Intégration d'une forme différentielle le long de certaines courbes non rectifiables.....	93 ₁	169-183
GLICKSBERG, IRVING. Banach algebras with scattered structure spaces.....	98 ₂	518-526
GLIMM, J. G. On a certain class of operator algebras.....	95 ₂	318-340
GOLDMAN, OSCAR and AUSLANDER, MAURICE. Maximal orders.....	97 ₁	1- 24
— The Brauer group of a commutative ring.....	97 ₃	367-409
GORDON, HUGH. Topologies and projections on Riesz spaces	94 ₃	529-551
GORDON, HUGH and COMFORT, W. W. Vitali's theorem for invariant measures.....	99 ₁	83- 90
GORMAN, C. D. Brownian motion of rotation.....	94 ₁	103-117
GOSSELIN, R. P. Some theorems on L^p Fourier series.....	92 ₂	291-301
GOTTSCHALK, W. H. and ELLIS, ROBERT. Homomorphisms of transformation groups.....	94 ₂	258-271
GROSS, LEONARD. Integration and nonlinear transformations in Hilbert space.....	94 ₂	404-440
GROSSWALD, EMIL. Correction and addition to "Some theorems concerning partitions".....	95 ₁	190
GRÜNBAUM, B. Projection constants.....	95 ₂	451-465
GUNNING, R. C. The Eichler cohomology groups and automorphic forms.....	100 ₁	44- 62
GUY, D. L. Hankel multiplier transformations and weighted p -norms.....	95 ₁	137-189
HAHN, F. J. Nets and recurrence in transformation groups..	99 ₂	193-200
HANANI, HAIM. A generalization of the Banach and Mazur game.....	94 ₁	86-102
HANO, JUN-ICHI and KOBAYASHI, SHOSHICHI. A fibering of a class of homogeneous complex manifolds.....	94 ₂	233-243
HARPER, L. R., JR. On differentially simple algebras.....	100 ₁	63- 72
HARRIS, B. Cohomology of Lie triple systems and Lie algebras with involution.....	98 ₁	148-162

	VOL.	PAGES
HARRIS, R. T. Generalized eigenfunction expansions for operator algebras.....	98 ₁	485-500
HARTMAN, PHILIP. On exterior derivatives and solutions of ordinary differential equations.....	91 ₁	277-293
— On boundary value problems for systems of ordinary, nonlinear, second order differential equations.....	96 ₁	493-509
HARTNETT, W. E. and KRUSE, A. H. Differentiation of set functions using Vitali coverings.....	96 ₁	185-209
HAYNSWORTH, E. V. Bounds for determinants with positive diagonals.....	96 ₁	395-399
HEBLE, M. P. A regression problem concerning stationary processes.....	99 ₁	350-371
HELLER, ALEX. On the Künneth theorem.....	98 ₁	450-458
— The loop-space functor in homological algebra.....	96 ₁	382-394
HENRICI, P. and FORSYTHE, G. E. The cyclic Jacobi method for computing the principal values of a complex matrix.....	94 ₁	1- 23
HERZ, C. S. The spectral theory of bounded functions.....	94 ₁	181-232
HEUSER, HARRO. On the spectral theory of symmetric finite operators.....	94 ₁	327-336
HEWITT, EDWIN and ZUCKERMAN, H. S. Some theorems on lacunary Fourier series, with extensions to compact groups.....	93 ₁	1- 19
HILTON, P. J. Remark on free products of groups.....	96 ₁	478-487
HIRSCH, M. W. Immersions of manifolds.....	93 ₁	242-276
HIRSCHMAN, ISIDORE, JR. and ASKEY, RICHARD. Weighted quadratic norms and ultraspherical polynomials. I.....	91 ₁	294-313
HIRSCHMAN, I. I., JR. Weighted quadratic norms and ultraspherical polynomials. II.....	91 ₁	314-329
HOWARD, HENRY. Oscillation criteria for fourth-order linear differential equations.....	96 ₁	296-311
HUDSON, A. L. Some semigroups on an n -cell.....	99 ₁	255-263
HUNTER, R. P. On the semigroup structure of continua.....	93 ₁	356-368
IONESCU TULCEA, C. T. and EDWARDS, D. A. Some remarks on commutative algebras of operators on Banach spaces.....	93 ₁	541-551
ISBELL, J. R. and GINSBURG, SEYMOUR. Some operators on uniform spaces.....	93 ₁	145-168
JENKINS, J. A. An extension of the general coefficient theorem.....	95 ₁	387-407
— On certain coefficients of univalent functions. II.....	96 ₁	534-545
JERRARD, R. P. Inscribed squares in plane curves.....	98 ₁	234-241
JOHNSON, G. P. Spaces of functions with values in a Banach algebra.....	92 ₁	411-429

	VOL.	PAGES
JOHNSON, GUY. Functions which have harmonic support. . .	92 ₂	302-321
— A flux integral theorem for functions which have harmonic support.	98 ₁	163-185
JOHNSON, R. S. On monosplines of least deviation.	93 ₃	458-477
JÓNSSON, BJARNI. Representation of modular lattices and of relation algebras.	92 ₃	449-464
— Representations of complemented modular lattices. . . .	97 ₁	64- 94
KAPLAN, SAMUEL. The second dual of the space of continuous functions. II.	93 ₂	329-350
KELLOG, R. B. Hyperbolic equations with multiple characteristics.	93 ₂	277-291
KELLY, PAUL and MERRIELL, DAVID. A class of graphs. . . .	96 ₃	488-492
KELMAN, R. B. A class of differential-functional systems. I	96 ₁	54- 66
KESTEN, HARRY. Symmetric random walks on groups.	92 ₂	336-354
KESTON, J. F., SUPNICK, FRED and COHEN, H. J. On the powers of a real number reduced modulo one.	94 ₂	244-257
KHABBAZ, S. A. Abelian torsion groups having a minimal system of generators.	98 ₃	527-538
KIMME, E. G. Some equivalence conditions for the uniform convergence in distribution of sequences of stochastic processes.	95 ₃	495-515
KISTER, J. M. Isotopies in 3-manifolds.	97 ₂	213-224
KLEENE, S. C. Recursive functionals and quantifiers of finite types. I.	91 ₁	1- 52
KOBAYASHI, SHOSHICHI. Geometry of bounded domains. . . .	92 ₂	267-290
KOBAYASHI, SHOSHICHI and HANO, JUN-ICHI. A fibering of a class of homogeneous complex manifolds.	94 ₂	233-243
KOPPELMAN, WALTER. On the spectral theory of singular integral operators.	97 ₁	35- 63
KOREVAAR, JACOB. Pansions and the theory of Fourier transforms.	91 ₁	53-101
KOSTANT, BERTRAM. A formula for the multiplicity of a weight.	93 ₁	53- 73
KREIDER, D. L. and ROGERS, HARTLEY, JR. Constructive versions of ordinal number classes.	100 ₂	325-369
KRUSE, A. H. Some developments in the theory of numerations.	97 ₃	523-553
KRUSE, A. H. and HARTNETT, W. E. Differentiation of set functions using Vitali coverings.	96 ₂	185-209
KRUSKAL, J. B. Well-quasi-ordering, the tree theorem, and Vazsonyi's conjecture.	95 ₂	210-225
LAHA, R. G. On a class of distribution functions where the quotient follows the Cauchy law.	93 ₂	205-215

	VOL.	PAGES
LANDAU, H. J. On canonical conformal maps of multiply connected domains.....	99 ₁	1- 20
LANDAU, H. J. and WALSH, J. L. On canonical conformal maps of multiply connected regions.....	93 ₁	81- 96
LANGENHOP, C. E. On bounded matrices and kinematic similarity.....	97 ₂	317-326
LANGER, R. E. Formal solutions and a related equation for a class of fourth order differential equations of a hydrodynamic type.....	92 ₄	371-410
LEES, MILTON. Energy inequalities for the solution of differential equations.....	94 ₁	58- 73
LEHNER, G. R. Extending homeomorphisms on the pseudoarc.....	98 ₂	369-394
LEVEQUE, W. J. On the frequency of small fractional parts in certain real sequences. II.....	94 ₁	130-149
LEVINE, JACK and CARLITZ, LEONARD. Some problems concerning Kummer's congruences for the Euler numbers and polynomials.....	96 ₁	23- 37
LIN, C. C. and RABENSTEIN, A. L. On the asymptotic solutions of a class of ordinary differential equations of the fourth order. I. Existence of regular formal solutions...	94 ₁	24- 57
LISSNER, DAVID. Matrices over polynomial rings.....	98 ₂	285-305
LLOYD, S. P. A sampling theorem for stationary (wide sense) stochastic processes.....	92 ₁	1- 12
LORENTZ, G. G. Lower bounds for the degree of approximation.....	97 ₁	25- 34
LOSEY, GERALD. On dimension subgroups.....	97 ₃	474-486
LUBKIN, SAUL. Imbedding of abelian categories.....	97 ₃	410-417
LUMER, GUNTER. Semi-inner-product spaces.....	100 ₁	29- 43
LUNDELL, A. T. Obstruction theory of principal fibre bundles	97 ₁	161-192
LYNDON, R. C. Equations in free groups.....	96 ₃	445-457
— Groups with parametric exponents.....	96 ₃	518-533
McKELVEY, ROBERT. Solution about a singular point of a linear differential equation involving a large parameter	91 ₃	410-424
MCLEOD, R. M. On the zeros of the derivatives of some entire functions.....	91 ₂	354-367
McMILLAN, D. R., JR. On homologically trivial 3-manifolds	98 ₂	350-367
MACCARTHY, J. G. Wedges in abelian groups and in linear topological spaces.....	100 ₂	241-251
MACLANE, SAUNDERS. Group extensions by primary abelian groups.....	95 ₁	1- 16
MACAULEY, R. A. Analytic group kernels and Lie algebra kernels.....	95 ₃	530-553

	VOL.	PAGES
MAHARAM, DOROTHY. Homogeneous extensions of positive linear operators.....	99 ₁	62- 82
MANN, L. N. Compact abelian transformation groups.....	99 ₁	41- 59
MARCUS, SOLOMON. Sur la représentation d'une fonction arbitraire par des fonctions jouissant de la propriété de Darboux.....	95 ₁	489-494
MARDEŠIĆ, SIBE. Infinite Cartesian products and a problem concerning homology local connectedness.....	93 ₁	395-417
MARKUS, L. and AUSLANDER, LOUIS. Classical differential equations on manifolds.....	91 ₁	113-128
MATLIS, EBEN. Modules with descending chain condition..	97 ₁	495-508
MAXWELL, C. N. An order relation among topological spaces	99 ₂	201-204
MEAD, D. G. Sublinear differential polynomials.....	95 ₁	124-136
MERRIELL, DAVID and KELLY, PAUL. A class of graphs....	96 ₁	488-492
MICKLE, E. J. On a decomposition theorem of Federer.....	92 ₂	322-335
MICKLE, E. J. and RADÓ, T. A uniqueness theorem for Haar measure.....	93 ₁	492-508
MOORE, R. A. and NEHARI, ZEEV. Nonoscillation theorems for a class of nonlinear differential equations.....	93 ₁	30- 52
MOREL, A. C. On the arithmetic of order types.....	92 ₁	48- 71
MOSTERT, P. S. and SHIELDS, A. L. Semigroups with identity on a manifold.....	91 ₁	380-389
— One-parameter semigroups in a semigroup.....	96 ₁	510-517
MOTZKIN, T. S. and WALSH, J. L. Polynomials of best approximation on a real finite point set. I.....	91 ₂	231-245
MUCKENHOUPT, BENJAMIN. Automorphisms of formal power series under substitution.....	99 ₁	373-383
NEHARI, ZEEV. On a class of nonlinear second-order differential equations.....	95 ₁	101-123
NEHARI, ZEEV and MOORE, R. A. Nonoscillation theorems for a class of nonlinear differential equations.....	93 ₁	30- 52
NEMITZ, W. C. On a decomposition theorem for measures in Euclidean n -space.....	98 ₁	306-333
NERODE, A. Composita, equations, and freely generated algebras.....	91 ₁	139-151
NEWMAN, D. J. Interpolation in H^∞	92 ₁	501-507
NEWMAN, MORRIS. Periodicity modulo m and divisibility properties of the partition function.....	97 ₁	225-236
NEWMAN, MORRIS and REINER, I. Inclusion theorems for congruence subgroups.....	91 ₁	369-379
NICKERSON, H. K. On differential operators and connections	99 ₁	509-539
NIVEN, IVAN. Uniform distribution of sequences of integers	98 ₁	52- 61

	VOL.	PAGES
NIVEN, IVAN and FRIEDMAN, BERNARD. The average first recurrence time.....	92 ₁	25- 34
OGAWA, HAJIMU. On difference methods for the solution of a Cauchy problem for a hyperbolic equation with data on a parabolic line.....	100 ₃	395-403
— On difference methods for the solution of a Tricomi problem.....	100 ₃	404-424
O'KEEFE, K. B. A property of the differential ideal $[y^p]$...	94 ₃	483-497
ORE, OYSTEIN. Graphs and subgraphs. II.....	93 ₂	185-204
